

Replace Pagers and Eliminate Unsecured Messaging

Achieve secure two-way messaging with miSecureMessages

Keeping patient information protected and secure is not only good business, it's also required by HIPAA and HITECH regulations. You knew that. But did you know this also applies to your answering service when they communicate with your doctors? Furthermore, did you know you're legally responsible if your answering service isn't compliant?

Protect the Privacy of Patient Healthcare Information with miSecureMessages

- HIPAA compliant messaging
- HITECH certified
- Secure PHI and ePHI

That's why you need the miSecureMessages app. Encrypt messages and patient information with miSecureMessages. This helps ensure protected health information (PHI) data remains confidential. Use miSecureMessages for answering service to doctor communication, for doctor to doctor communication, and for internal communication. Your organization's future—and your job—is at stake.

Key Outcomes

- Improve workflows
- Increase effectiveness
- Enhance security

Key Benefits

- Powerful yet easy to use
